hospital management**

The brand new ZNA CADIX hospital, 15 floors of high-tech care: 318 Silentia folding screens in all consultations and care departments ensure efficient hygiene and comfortable privacy.

HYGIENIC AND TRANSLUCENT FOLDING SCREENS

A matter of common sense and cost-conscious thinking

Here we see the preparations and pre-assembly of the translucent folding screens.

Unlike privacy curtains, Silentia folding screens allow plenty of daylight to flow in.

Mobile folding screens set up in rears position, offer privacy when there is little space available due to healthcare equipment

Imagine a care facility where every multi-occupancy room is bathed in daylight thanks to translucent Silentia privacy screens and separation curtains don't darken the room. Plenty of daylight is comfortable and inviting for patients and caregivers. Imagine folding screens that are both functional and aesthetically pleasing. Imagine the convenience of operating these folding screens with just one hand, allowing you to clean them quickly and efficiently, keeping the environment clean and hygienic.

SUSTAINABILITY AND COST EFFICIENCY

With a total of 318 innovative Silentia privacy screens, ZNA Cadix opted resolutely for hygiene efficiency, maximum infection prevention, and sustainable cost efficiency. The translucent privacy screens made of impact-resistant polycarbonate not only let in maximum daylight, but with their high recyclability of 99.8%, they also contribute to a more sustainable future. That's not to say that they break down easily, though. In 1990, UZA was the first Belgian hospital to order several Silentia privacy screens. They are still in use to this day, 33 years later. This proves their exceptional Swedish quality.

Silentia folding screens provide comfort and hygienic privacy here in combination with seating positions.

Silentia folding screens with children's prints provide distraction in pediatrics.

FOR A BRIGHTER, CLEANER, AND MORE EFFICIENT CARE SPACE

You can operate the Silentia privacy screens very easily thanks to memory hinges that follow the folding path. The surface is dirt-repellent so they stay clean and hygienic. Cleaning is a breeze: just wipe the handle down with a disinfectant wipe and you're done! Gone is the hassle of washing curtains at high temperatures, then disinfecting, drying, ironing, and storing them away. Also hanging spare curtains, repairing loose hooks, seams, and hems, folding and packing, labelling and stocking, etc.: all of this becomes a thing of the past. With Silentia privacy screens, you can concentrate on what really matters: providing exceptional care to your patients.

Silentia fixed walls in combination with folding screens provide privacy boxes.
